What is SAVI?

NSF Science across Virtual Institutes (SAVI) Program

Maintain strong bonds and foster interactions between **GLEON** and **SAFER** (Sensing the Americas' Freshwater Ecosystem Risks)

Increase research capacity and develop strong collaborations between investigators throughout the Americas

3 Main SAVI Funding Mechanisms

- **Travel grants** to promote participation in GLEON and SAFER meetings
 - 9 students + 1 faculty at this meeting!
- **Travel & fellowship** funds to help graduate students and postdoc to attend relevant training events
- **Graduate fellowships** for U.S. students interested in engaging with SAFER activities/sites/people in Latin American and Canada.

One snapshot

- SAVI funded **Beverley Wemple** (U Vermont) to help organize the SAFER Spatial Analysis and Watershed Modeling short course

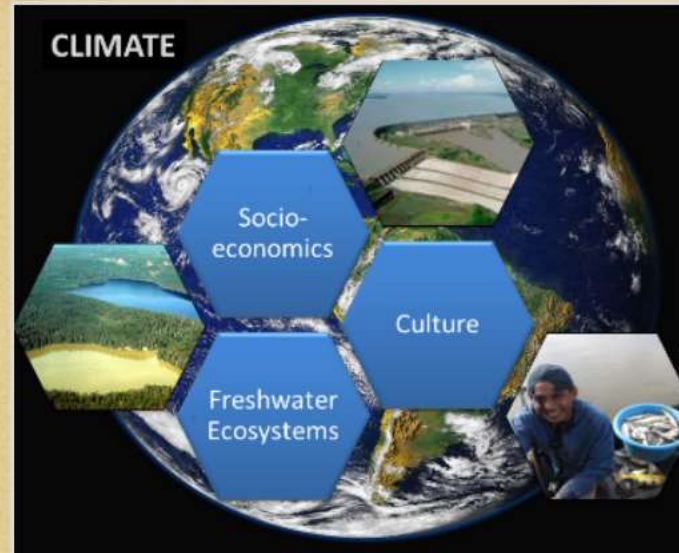

First SAFER graduate training workshop
Coihaique, Chile May 1-6, 2014

Science Across Virtual Institutes (SAVI)

This virtual institute (SAVI) provides a bridge between our *NSF WSC* and *SAFER* projects, and the *Global Lake Ecological Observation Network (GLEON)*. The research focuses on quantifying ecosystem process and service changes in the face of changing climate, and on identifying the best adaptation strategies in different socioeconomic and cultural settings.

The SAVI project is funded by the US NSF (Award CBET-1336839, 2013-2016), and will increase our research capacity in the above-mentioned areas by offering funding opportunities to U.S. investigators and students with relevant interests.

TRAVEL AWARDS for SAFER & GLEON Meetings!

Travel awards are available to U.S. investigators and students to support participation in *GLEON* or *SAFER* meetings and workshops. NOTE: *GLEON* and *SAFER*

GRADUATE & EARLY CAREER TRAINING PROGRAMS!

Grants to participate WSC-SAVI relevant U.S. graduate and postdoctoral training, such as the *GLEON Graduate Fellowship Program*.

GRADUATE FELLOWSHIPS AND TRAVEL AWARDS FOR INTERNATIONAL COLLABORATION

Our "Endless Summer" (or winter!) program provides travel and subsistence funding to U.S. graduate students. For more details, check out the *APPLICATION*.
